Subject: Intimation for the launch of new business vertical –“Sustainability Services”.

Scip Code: 543284

Dear Sir(s),

With reference to the captioned subject and pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (“Listing Regulations”), we are pleased to inform you that the Company has launched a new business vertical on - “Sustainability Services”.

The new business vertical will be offering comprehensive services to companies focusing on Climate change and ESG (Environmental, Social & Governance) areas.

Our areas of interventions will be, providing services to companies on Climate change mitigation, climate disclosure, National and Global ESG frameworks, various Green Ratings & Credentials as well as many such similar subjects, that will enable companies to enhance their performance and fast-track their goals.

The detailed press release for the launch of Sustainability Services is attached as **Annexure I** to this letter for your kind reference.

We request you to kindly take the same on record.

Thanking You,
Yours Sincerely

For **EKI Energy Services Limited**

Itisha Sahu

EKI Energy Serviced Ltd. (EKIESL) launches new arm for Sustainability Services

- *Expands leadership team of the new business arm as part of a strategic step to drive increased focus on service delivery and customer satisfaction*
- *Revamps its comprehensive bouquet of offerings with state-of-the-art climate solutions that can be customized for customer's unique climate requirements*

India, February 03, 2022: EKI Energy Services Ltd. (EKIESL), a leading developer and supplier of carbon credits in the World, today announced the launch of a new arm for its Sustainability Services.

Established after a detailed research and development (R&D) of the unique climate compliance requirements of companies today, the new business arm will offer an exhaustive bouquet of strategic solutions that will enable companies to fast-track their climate goals. The new Sustainability Service arm will offer specialized and customized solutions to companies across all business sectors including start-ups, corporates, Govt. bodies and business conglomerates amongst others across the globe.

The company has also established a new leadership team who will together spearhead the delivery of the sustainable solutions to customers with an aim to drive customer satisfaction like never before. EKIESL's recently appointed Head of Business Development – Mr. Navin Mathur will be leading the new arm with his deep sector knowledge and vast experience.

Mr. Manish Dabkara, CMD & CEO, EKI Energy Services Ltd. said, “Today, even though every activity that an organization undertakes irrespectively trails a carbon footprint, climate compliance continues to be a largely voluntary practice by companies. Most organizations are therefore not able to even gauge the adverse effect of their business activities on climate. As climate evangelists, we strongly recommend that it is time every company understood their climate obligations. We have set up this new business arm with this strategic thought process and we aim to first educate customers on the importance on being climate conscious and then onboard them to adopt sustainable practices. With our sustainability services arm, we plan to enable as many companies as possible to become climate action heroes.”

Some of the offerings of the Sustainability Services arm includes - ESG frameworks, customized programs and certifications for Green Ratings & Credentials, Climate Action and Environmental advisory services and customized training programs that enable companies to report greenhouse emissions and efficiently reduce the emissions.

As part of its revamped offerings, the new business arm will also design customized strategic roadmaps with definitive goals and also enable companies to align their climate goals to global standards and policy guidelines. With EKIESL's customized reporting and tracking, companies will now be able to measure their real-time progress.

EKIESL has also entered into a partnership with Shell Overseas Investments B.V. (a unit of Royal Dutch Shell plc) to launch a joint venture to work on reducing carbon emissions in India through Nature based solutions. The company has also established its presence in Dubai with a wholly owned subsidiary. EKIESL has also announced the incorporation of a new associate – GHG Reduction Technologies Pvt. Ltd. for the backward integration of carbon credit supply through its Green Cooking initiative.
